Six hundred twenty-two public health traineeships amounting to \$2 million were awarded during the fiscal year that ended June 30, 1960. Of this number, 377 were awarded through grants to schools, and 245 were awarded directly to trainees. The traineeships went to doctors, nurses, dentists, nutritionists, sanitary engineers, veterinarians and other public health workers in all 50 states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands.—USPHS News Release (8-60).

Cardiovascular Seminars To Be Held

Two seminars on cardiovascular disease will be held for public health workers in California in the near future. The first is scheduled for February 21, 22, and 23 at the Chandler Haskell Training Center in Brea. The second will be held in northern California, March 21, 22, and 23; location to be decided.

Both seminars will emphasize epidemiology and program planning relative to the health department's role in cardiovascular disease control. Public health personnel attending will have an opportunity to explore together the latest information, methods, and trends pertaining to cardiovascular disease control.

The seminars are planned as part of a continuing education program conducted by the University of California School of Public Health and the Western Branch and Western Regional Office of the American Public Health Association, and are being sponsored by the California State Department of Public Health, the California Heart Association, and the Northern and Southern California Public Health Associations. The Brea seminar is also being sponsored by the Arizona Public Health Association.

Detailed information about the seminars will be sent to public health workers throughout California.

Public Health Positions

Fresno County

Assistant Director Public Health Nursing: Salary range, \$532-\$665. Seeking experienced creative PHN to develop and implement training program. Position requires a master's degree in public health nursing administration from a university program approved by NLN, or an MPH from a university program approved by the APHA, plus four years of progressively responsible PHN experience including two years in a supervisory capacity. Must have valid California PHN certificate or obtain it during probationary period.

Sanitarian: Salary range, \$392-\$478. Starting salary depends upon qualifications and experience. Public health degree preferred. For more information contact A. J. Engle, Director of Sanitation, P.O. Box 119, Santa Barbara, California.

Survey findings are revealing a high concentration of problems of dependency, ill health, and maladjustment in relatively small groups of families. . . . A three year study completed in 1956 showed that less than two percent of the families of the community were responsible for 40 percent of all instances of disordered behavior that were dealt with by official agencies.—*Children in a Changing World*, Published by White House Conference on Children and Youth, 1960.
